Cabinet Structure

Vega Base series cabinets reach the maximum strength with 45-degree vertical profiles fixed to the solid bottom and top frame with steel screws. An ideal solution for your heavy equipment with up to 600kg loading capacity because of special designed 7 bent surfaces of corner profiles. Also, cabinets own a modular structure. The cabinets could be mounted side by side.

They are network and server cabinets; suitable for office, system room,data centre, and cabling system installation. Compatible for all kind of 19'' brands and models network and server equipments.

During installation and while conducting routine maintenance and repair of installed equipment; removable side panels, rear door and the top plate allows to multiple easy access. Optimum depth for comfort cabling, server housing and equipment in the cabinets.

Side panels, Front and rear doors are lockable and accessible with the same key. Front and rear doors could be detached and reversed to allow the door to open from the rear of the cabinet.

Levelling Feet and Castors

The balance of the cabinet can be adjusted according to the height and floor conditions with 4 height-adjustable leveling feet install on the lower corners of the cabinet.

Optionally, each castor set is of 4 which 2 are with breakes, 2 are without breakes can be offered.

Side Horizontal Support Bar

Cabinets are supported by side horizontal support bar through depth and height directly proportional.

Additional Side Panels

In cabinets with a depth of 1000mm and above, additional side panels are fixed from the inside of the cabinet, increasing the strength of the cabinet and creating space inside for the cabling and PDU. This cover can be done as perforated if additional ventilation is required in the cabinet.

Side Panels

The side panel model of VEGA series cabinets allows easy removal of side panels during assembly, maintenance and repair. The cylindrical locking mechanism is used on the panels.
